"Researchers have documented that exposure to music in early childhood has a positive effect on the brain and that the earlier you start, the better."—CNN

"My son has been taking Music Pups® since he was 6 months old. Now at 3 he has a true passion for music that I can only attribute to the class. There is no question that Music Pups has influenced his development in memorization, self confidence, self expression, rhythm and tones. I am so grateful to be involved with this program!" —C.S.

"My daughter and I LOVE to go to music class and when we are not at music class we are listening to the cd at home. Our teacher is so much fun, she does a great job keeping all of the children involved and making sure that everyone is having fun. I am glad that I found class while my daughter is still young..." —K.R.
